Dear Sir/Madam,

Sub: We have provide an opportunity to seek project service for the faculties on "A battery saver program for Android devices"-Reg

Greeting from NoviTech!

Happy to introduce ourselves from NoviTech!

We are glad to be in association with your illustrious Institution to seek project service on Application Development.

Problem Statement:

Android devices are infamous for the amount of battery that they consume. Because Android is open-source, there are a lot of different devices out there. Optimizing apps for such a vast ecosystem is still a massive challenge for any app developer. Due to this poor optimization of apps, they tend to consume more battery.

Another reason which could be said for the rapid decline of the battery percentage is the poor ram and other resources management, which you would find on the third party reskin of stock android. Your task in this project would be to create a battery saver app to help this omnipotent issue.

This battery saver should be built natively for android. You can use a few different tricks like stooping the apps running in the background by force, ensuring that the user is notified of any app is draining large chunks of battery. Finally, you can also use ram management to your advantage by limiting the number of apps that are opened at any given time.

We hereby inform you concerning the project service as we have learnt from our closely knitted association about your endless service of Knowledge.

Thanking You,

Magnificent Engineerrrs

Dear Sir,

Sub: R& D project Discussion- Process Requisition – Reg.

I came to know that, Department of ECS of your esteemed institution offers Research Project. In this regard, I request you to provide me a proposal for the project entitled 'Design and develop a PLC based cutting machine'. We would be grateful to you, if you could depute your experts to our company premises to have discussion for the same.

Thanking You,
